

Melt Shade Chrome 30cm

With Melt, our experiments in the technologically advanced field of vacuum metallisation take on a new twist. Melt Chrome is a distorted lighting globe born from our collaboration with Swedish radical design collective FRONT. The light bouncing and reflecting around the uneven surfaces creates a dramatic melting hot blown glass effect. Melt is translucent when on and mirror finish when off. Its internal luminosity is visible in full daylight. At night, it emits an attractive, mildly hallucinogenic light, akin to recent Hubble Telescope images of the cosmos. Also available in 50cm and in copper and gold.

Process	A blow-moulded 30cm polycarbonate shade with a semi-metallised interior that is a solid liquid mass when off and semi-transparent when lit.
